Residents of the Minong Flowage and Cranberry Lake

Ref. Notification of a 12 inch draw down of the Minong Flowage for dam repairs.

Dear Residents. I'm sending you this notification as a follow-up to the letter that was sent out dated November 7, 2018. There will be a temporary 12 inch draw down of the Minong Flowage starting approximately on August 14th. On August 19th repairs will begin on the old section of the dam. If you recall the gunite or wear surface on the face of the dam is deteriorated and needs replaced. Pictures of this are on the Washburn County Government web site. This work will take 7-10 days to complete and then several days to get the lake level back to normal.

If you have any questions or concerns, please feel free to call our office.

Sincerely,

Frank Scalzo / Commissioner

Cc. Chris Goodwin – Ayres & Associates
Jacob Druffner – DNR / Water Management Engineer
